

Trent University

Trent is one of the most beautiful Universities in the world.

- A Natural setting on the Otonabee River.
- Beautiful unique buildings blending into the Natural setting.

The Trent property is over 1,450 acres, 600 acres are designated as "Nature Lands", another 600 acres is open area. The main campus is approximately 250 acres.

The Main campus (The Symons Campus) is located on both the East Bank and West Bank of the Otonabee. The Faryon bridge over the Otonabee is a focal point for walkers. The Trent Canal merges with the Otonabee at Trent so it is neat to watch pleasure craft in addition to rowers and kayakers from the view point of the Faryon Bridge.

Trent has an "environmental consciousness" that is appreciated by all.

Champlain College - view of the West bank from the Faryon Bridge

Peter Gzowski College - view of the East bank from the Faryon Bridge

Looking downstream (South) from the Faryon Bridge, shadows of the Bata Library on the right.

Roof-top garden. The Chemical Sciences Building has grass & gardens on its Roof.

Some boats on the Otonabee/Trent Canal System

Trent Power House - The University makes its own "green energy"
